COMMENTS TO AUTHORS

This is a well written manuscript and may be accepted for publication. The references need to be in Vancouver style.

COMMENTS TO AUTHORS

This is a very nice and informative review. I have no important change to suggest. My only recommendation is to include a table and/or a flowchart, which is possible in some sections of the paper.

COMMENTS TO AUTHORS

Authors, all known to be dedicated to follow patients with HCC, wrote a nice review over an important issue in Hepato-Oncology focusing on early diagnosis of HCC as a tool for improving the overall survival. The ms has been written clearly and can be easily read. Bibliography is updated and critical issues are discussed briefly but neatly, reflecting the rationale that drives the good clinical practice in Italy on this topic.
