Cutting edge of endoscopic full-thickness resection for gastric tumor

Tadateru Maehata, Osamu Goto, Hiroya Takeuchi, Yuko Kitagawa, Naohisa Yahagi

Abstract

Recently, several studies have reported local full-thickness resection techniques using flexible endoscopy for gastric tumors, such as gastrointestinal stromal tumors, gastric carcinoid tumors, and early gastric cancer (EGC). These techniques have the advantage of allowing precise resection lines to be determined using intraluminal endoscopy. Thus, it is possible to minimize the
