Editors-in-Chief

Massimiliano Leigheb

Xiao-Jian Ye

Dear Drs. Leigheb and Ye,

I am writing to verify that the manuscript titled “**Mid-Term Outcomes of a Kinematically Designed Cruciate Retaining Total Knee Arthroplasty**” and submitted to the *World Journal of Orthopedics* has been reviewed by our team of biostatisticians at NYU Langone.

The ethical implications were reviewed by our institutions IRB board. Our team collaborated with the biostatisticians here at NYU Langone when determining the methodology and performing all statistical analyses. We are happy to answer any questions on our methodology if they arise.

Sincerely,

A handwritten signature in black ink, appearing to read 'Jonathan Katzman', with a stylized, cursive script.

Jonathan Katzman, BA
