

Conflict of Interests

K. S. and I. U. are funded by Intuitive Surgical, Inc. in relation to a multi-institutional single-arm prospective study, which Japanese Ministry of Health, Labor, and Welfare has recently approved for Advanced Medical Technology ("Clinical advantage of robotic radical gastrectomy for gastric cancer: multi-institutional prospective cohort study", INTUITIVE SURGICAL OPERATIONS, INC. 2015 CLINICAL ROBOTIC RESEARCH GRANT, \$50,000). M. N., K. I. and Y. I. have no commercial association with or financial involvement that might pose a conflict of interest in connection with the submitted article.

I confirm that the information reported above are accurate and that all authors have declared their relevant conflict of interest.

If a failure of accurate report about COI disclosure is suspected, the matter will be resolved following the procedure detailed in COPE guidelines
