

Journal: World Journal of Nephrology
Reference: Manuscript 26917

With respect to the manuscript entitled "Importance of Regional Renal Registries: Latin American Dialysis and Transplant Registry experience and contributions to the knowledge of ESRD epidemiology", sent for publication to the World Journal of Nephrology the authors declare they have participated from the initial conception and planning to the presence.

They also declare they did not have received any financial support nor grant for this work.

We also declare we do not have financial relationships with entities in the biomedical arena that could be perceived to influence, or that give the appearance of potentially influencing, what we wrote in the submitted work.

So, the authors declare they do not have any conflict of interest in relation to the present manuscript.
