COMMENTS TO AUTHORS

Dear author, the paper is well written and nice to read but several minor changes may improve the "take home message" of this paper. The structure of the paper is sometime boring for the reader, I would suggest to compare the published studies in tables.

COMMENTS TO AUTHORS

Good review, the table is confusing, maybe the authors on the left would be more easy for the Reader- References are mostly incomplete, especially the year of publication

COMMENTS TO AUTHORS

This invited review manuscript is well written, fairly covered every aspect of the topic. Two minor suggestions: 1. please provide a photo or drawing picture depict the anterior approach which will entertain the readership of the journal. 2. The authors may briefly describe two different ways to perform anterior approach to the hip: use a specific table (such as henna table) and use a regular table.
