COMMENTS TO AUTHORS

This is an excellent review about alcoholic liver disease. This manuscript is nicely structured and very well written. I have no question about this manuscript.

COMMENTS TO AUTHORS

The authors reviewed the classification, prognostic scoring systems and several treatment options of severe alcoholic hepatitis in recent years. This review is well organized and written. However, some minor revisions should be made to refine this manuscript. Under the topic of "Specific therapies", some subtitles should be indicated such as "Corticosteroid treatment", "Pentoxifylline", "Anti-TNF agents" etc, so as to make the review clearly structured. Besides, the description of N-acetyl cysteine should be clarified into the part of "Specific therapies" instead of "General therapeutic measures".

COMMENTS TO AUTHORS

organized review article. In this review, Kim Won and Kim Joon Dong managed to address several important issues regarding different types of alcohol-induced liver failure, they described new prognostic scoring systems, general therapeutic measures, and potential specific therapies in patients with severe alcoholic steatohepatitis from a clinical perspective. The collected data are described in detail and well discussed in each section of the manuscript. The data regarding clinical scoring systems as well as data about molecular novel targeted therapies for alcoholic hepatitis are also explained in table format.
