

Hello, editors and reviewers:

Based on the opinions of the reviewing experts, we have made the following modifications to the article:

1. We invited a third-party organization to polish the language of the article, which increased its readability.
2. Adjusted the order and language expression of the introduction section, and removed irrelevant sentences.
- 3.:Enriched the content of past history (including neonatal period).
- 4.: The laboratory test results have been simplified.
5. The reviewing experts have doubts about the judgment of whether PAP has recurred and whether to undergo bronchoscopy again. Therefore, we have added corresponding content in the text.
6. In the discussion section, it was emphasized that XLA is considered a secondary cause of PAP, and IVIG treatment can improve PAP.
