COMMENTS TO AUTHORS

This is a good topic but over simplified paper on the summary of guidelines available for good refractive outcomes following cataract surgery. Additions needed to cover more as this is by no means the only requirements for refractive surgery pre, peri, and post op. What about wavefront assessment? Different choice of premium lens? Astigmatic keratotomy? Role of femtosecond cataracts? Post op objective and subjective assessment? rms for HOAs? options for presbyopia?

COMMENTS TO AUTHORS

It was a pleasure to review this manuscript by Dr. Petros Aristodemou and associates. The manuscript was well written review article. The theme on the refractive outcomes in cataract surgery would be a great topic for more research and acceptable. I have no comments in this review article.

COMMENTS TO AUTHORS

This is a nice and well presented study regarding improvements in refractive outcomes of cataract surgery. Nevertheless, special and future scenarios as multifocal, light adjustable, trifocal IOLs; intraoperative wavefront, femtosecond cataract platforms should be mentioned and discussed.
