COMMENTS TO AUTHORS

The authors presented their experience in a rare case of cerebral arteriovenous malformation that cause cardiovascular instability in a newborn infant. Generally, the manuscript is well prepared and interesting. However, there are some typing errors and suggestions; 1. Abstract contains inadequate data and is not attractive. More details of the case might help. 2. Ref 4 might be in the wrong place and wrong style. 3. Page 5: multiple verb repeats 4. Page 5: 'Doppler studies' is not a formal terminology for this study., Page 6: 'Lasix' as well. 5. Page 7: please consider style consistency. 6. Figure 2 does not interest the reader and can be omitted. 7. Discussion is a bit lengthy.
