COMMENTS TO AUTHORS

It is a manuscript on a very important topic of anti-integrin therapy in IBD. Please add more data on safety issues of all studies on these therapies.

COMMENTS TO AUTHORS

It is very interesting and well written review, more data about safety of the use of these biological agents are needed it and it will be interesting if there is a comparison with other biological agents

COMMENTS TO AUTHORS

ESPS Manuscript NO: 38931 Title: Anti-integrin therapy for inflammatory bowel disease
 This review highlights a new drug therapy of inflammatory bowel disease – anti-integrin therapy. The authors conducted a review of existing literature on the anti-integrin agents currently approved and in use in clinical trials. They systematically described the anti-integrin drugs, clinical studies and outcomes of the treatment. The text is accompanied with table and figures which are clear, useful and easy to interpret. To improve the efficiency of the manuscript I suggest presenting the content more concisely because the manuscript is too long.
