SPECIFIC COMMENTS TO AUTHORS

I thank the authors for their work. My comments are the following: 1. Overall, the manuscript needs shortening and structuring to ensure a concise and purposeful presentation. 2. Please note that the introduction section needs to be an introduction and not a methodology. 3. In the methods section, the description of the variable requires unifying information, and where possible please include tables to provide at a glance orientation of the variables. 4. Table 1 would ideally represent the sociodemographic profile of the study population. 5. Table 3 needs reformatting. Not all data from statistical software are to be presented in the manuscript. 6. Strengths, limitations, and implications can be included under respective subheadings.

SPECIFIC COMMENTS TO AUTHORS

The research has addressed a very important aspect in the context of social disaster caused by the COVID-19. The relevant dimensions of mental health (State of anger & psychological distress) has been studied with most socially appropriate variables. The findings may be relevant at global scale to provide appropriate governance in such crisis of pandemic in mitigating the COVID -19 induced fragile mental health at community level . The findings could be beneficial for those who are in mental health counselling. Please kindly consider the observation and recommendations.
