ESPS Manuscript NO: 18707

Manuscript Type: MINIREVIEWS

Title: The role of laryngeal mask airway in laparoscopic cholecystectomy.

Dear Editor,

Thank you very much for the review and your comments. Accepting your invitation to revise the manuscript, we did in accordance with the reviewer's comments. We have rewritten the manuscript and we highlighted **in red** the points that we have altered. We also include this letter in which we respond to your critiques (point by point). We hope that this revision clarify your reviews.

Reviewer #1:

- 1) In the introduction section, some references were added according with the suggestions.
- 2) A paragraph about the capnography measurement was added.
- 3) A paragraph about the pneumoperitoneum pressure was added.
- 4) A comment about the importance of the LMA with drain channel in laparoscopy was added at the Discussion section.
- 5) An inclusion criteria paragraph was added at the Conclusion section.
- 4) The manuscript was reviewed by a native English speaker anesthesiologist from the UK for its improvement in linguistic expression.

Yours sincerely,

Dr. José M^a Beleña
