COMMENTS TO AUTHORS

This is an excellent review, well updated and with sound statistical methodology. I wish the Author could end the manuscript by providing some recommendation for treating peritonitis, by adding a table with suggested treatments. A minor observation: cefamezin(line 245) is a brand name for cefazolin

COMMENTS TO AUTHORS

The paper with the title:<< An update on treatments for peritoneal dialysis-related peritonitis>> is a very interesting update review paper and give information about the corrent peritonitis treatment on PD patients which is the major complication of Perinoneal dialysis. On line 67 there is a double s (has lost its s status)
