**Diabetic muscle infarction in end-stage renal disease: A scoping review on epidemiology, diagnosis and treatment**

Yong TY *et al.* Diabetic muscle infarction in end-stage renal disease

Tuck Yean Yong, Kareann Sok Fun Khow

### Abstract

Diabetic muscle infarction (DMI) refers to spontaneous ischemic necrosis of skeletal muscle among people with diabetes mellitus, unrelated to arterial occlusion. People with DMI may have coexisting end-stage renal disease (ESRD) but little is known about its epidemiology and clinical outcomes in this setting. This scoping review
