COMMENTS TO AUTHORS

The manuscript entitled "Mutational analysis of hepatitis E virus ORF1 Y-domain: Effects on RNA replication and virion infectivity" by Mohammad K. Parvez, is well performed and presented. In this study, the author has evaluated the characteristics of hepatitis E virus Y-domain derived from ORF1 and the role of this domain in the life cycle of virus. This study shows the importance and essentiality of Y-domain in HEV replication and infectivity. Generally, it is a novel study, well written and well organized. The references are not according to the format of the journal. Reference section: PMID and DOI should be included. Text: The reference numbers should be superscripted in square brackets at the end of the sentence.
