COMMENTS TO AUTHORS

Manuscript ID ESPS-15861 for your Journals entitled "Technical and instrumental prerequisites for Single-Port laparoscopic Solo Surgery: state of art." for this journal has been reviewed. Reviewer Comments to Author: This manuscript is a review of the single-port laparoscopic surgery. The manuscript is well written overall. However, there are some questionable issues that should be reviewed/discussed in the manuscript. **TITLE:** The title of manuscript is accurately reflected the major topic and contents of the study. **ABSTRACT:** This section is sufficient for give objectives of the study. **INTRODUCTION:** 1. The section of introduction should be shortened (especially paragraph #2). **OTHER SECTIONS:** 1. These sections are written satisfactorily. The authors should removed the sentence written as "which conventional laparoscopic surgery does not have." from abstract and other sections. Because SPSS is nearly same to SPLS without camera assistant as authors mentioned. Already the authors have mentioned that SPSS have some difficulties such as static operative image and repositioning. Therefore, SPSS may benefit to reduce surgical assistant. The surgeon who works as single without assistant may use these technical instruments. This topic

COMMENTS TO AUTHORS

Article well written, english is excellent. However, your article is more a review on the subject, than an original article.
