ESPS PEER-REVIEW REPORT

Name of journal: World Journal of Orthopedics

ESPS manuscript NO: 24615

Title: Quantifying prosthetic gait deviation using simple outcome measures

Reviewer's code: 03069301

Reviewer's country: Spain

Science editor: Xue-Mei Gong

Date sent for review: 2016-02-01 20:20

Date reviewed: 2016-03-07 15:00

COMMENTS TO AUTHORS

Very interesting paper, although aimed to a not very large scientific community among orthopaedic world. Methodology good. Presentation excellent.

COMMENTS TO AUTHORS

This study provides a great foundation for clinicians and researchers looking for simple, low cost objective and subjective measures to approximate more complex gait analysis. Study design and statistical analysis were appropriate. The only critiques of the study was the small sample size and large proportion of traumatic amputees, both of which you mentioned in your limitations section.
