Risk of HBV reactivation in rheumatoid arthritis patients undergoing biologic treatment: extending perspective from old to newer drugs.

De Nard Francesca, Todoerti Monica, Grosso Vittorio, Monti Sara, Breda Silvia, Rossi Silvia, Montecucco Carlomaurizio, Caporali Roberto

Abstract

Hepatitis B virus (HBV) reactivation in rheumatoid arthritis (RA) patients undergoing biological therapy is not infrequent. This condition can occur in patients with chronic hepatitis B (CHB) as well as in patients with resolved HBV infection. Current recommendations are mainly focused on prevention and management strategies of viral reactivation under tumor
