SPECIFIC COMMENTS TO AUTHORS

Dear Authors, I carefully read the manuscript "A γ -glutamyl-transferase-to-platelet ratio nomogram predicting overall survival of gallbladder carcinoma", which was submitted to World Journal of Gastrointestinal Oncology. The manuscript is about to assess the prognostic value of γ -glutamyl-transferase-to-platelet ratio in gallbladder carcinoma. In univariate and multivariate analysis patients in the high γ -glutamyl-transferase-to-platelet ratio group had a worse post-operative outcomes. Gamma-glutamyl-transferase-to-platelet ratio is a promising predictive model for overall survival in gallbladder carcinoma. The manuscript is interesting and within the scope of the World Journal of Gastrointestinal Oncology. Authors expressed their results adequately, and fairly discussed their results. Reference list is arranged according the journal's instructions. I recommended publication of manuscript in World Journal of Gastrointestinal Oncology.
