COMMENTS TO AUTHORS

Article "Asymptomatic hyperuricemia following renal transplantation" by Gianni Bellomo is according to my opinion, acceptable for publication. This article is interesting for persons involved in the field of the kidney transplantation. In the text there is need for some minor revisions: a) The text needed to be read again for some small corrections. For example in the fifth page studied and instead of studied and... b) The literature is not written in the unique and consistent way. For example in one reference after number of the last page of the article is fullstop (reference number 5) and in the other reference fullstop is missing (reference number 6).
