### JOURNAL EDITOR-IN-CHIEF (ASSOCIATE EDITOR) COMMENTS TO AUTHORS

The presented review article of Dr. Ponziani and colleagues is of high interest for the readers of WJH, well written and performed and concise in its content. The authors successfully implemented the main criticisms and comments raised by the reviewers in the revised version of the manuscript. The language meets the requirements for publication. However, there are some minor typing errors in the text, e.g. “chronicization” in the Introduction section, “subjectsth” in the IMPACT OF VIRAL ERADICATION ... para, “cirrhotics” should read cirrhotic patients or equivalent throughout the text. The tables 2 and 3 have been simplified, however, are still hard to read I consider accepting the revised manuscript for publication in World Journal of Hepatology after minor revision.

#### Answer:

The revised version of the manuscript, according to the Editor's comments. Please note that we have further simplified the tables, which are complex but also very informative. Should you have any suggestion on Tables revision please let us know.
