### COMMENTS TO AUTHORS

This is good review about drug eluting biliary stents may be useful for clinicians working at this area. However there are some points requiring corrections and revisions: 1-Paper must include a-Background and aim of the biliary stents, especially drug eluting stents b-Animal and human studies must be presented in different parts 2-Some abbreviations in the tables must be defined at the end of the table 3-References are relatively old. However there are very nice papers published at 2015 and 2014. They must be added to the text and discussed.
