SPECIFIC COMMENTS TO AUTHORS

This is a clinical relevant min-review paper on the recent hot topic of clinical efficacy of platelet-rich plasma, platelet-rich fibrin, and blood-clot revascularization for the regeneration of immature permanent teeth. The following point needs to be clarified. 1.

**Baishideng

E-mail: bpgoffice@wjgnet.com
https:// www.wjgnet.com

Please make sure it is a simple mini-review of the data within the selected three papers dealing with clinical efficacy of platelet-rich plasma, platelet-rich fibrin, and blood-clot revascularization for the regeneration of immature permanent teeth; or it is a meta-analysis for these three papers on this issue. If it is a meta-analysis, the data including forest plot, funnel plot and risk of bias need to be performed using specific meta-analysis software (such as RevMan 5.3 software) with the statistical evaluation of significance should be given.

SPECIFIC COMMENTS TO AUTHORS

This is a concise review of the topic. I could not call it a systematic review as there was not search, inclusion or exclusion criteria for literatures. The levels of evidence of the 3 reviewed studies were also missing. In short, a short review and analysis of three studies
