COMMENTS TO AUTHORS

This is a well performed study. I have only one concern. In the article, there is no data about the course of HBV infection or HCC, the time span of anti-HBV therapy and the efficacy of anti-HBV therapy. Is there any chance that the different time span of HBV infection, HCC or anti-HBV therapy, or the different efficacy of anti-HBV therapy will affect the distribution the HBV antigens?

COMMENTS TO AUTHORS

Interesting good article within the scope of the Journal. Several misprints in the text and referencies (titles of journals) are insignificant
