SPECIFIC COMMENTS TO AUTHORS

The authors has reported a testicular torsion case and introduced a new surgical method using collagen fleece (tachosil®) instead of tunica vagina flap in performing testicular fasciotomy. I have several questions and suggestions. 1. Does the testicular return to pink or has blood flow after detorsion? why do you decide to perform testicular fasciotomy? 2. There is too much content in your conclusion. 3. Many references are unavailble, please check them.

SPECIFIC COMMENTS TO AUTHORS

it is a case report but why you choose tachosel for this operation I could not get why you use it no long term follow up us 3 -6 months may be it become atrophied later why not use surgicel or other hemostatic sheets is it absorbed and when
