### COMMENTS TO AUTHORS

This systemic review is limited by the nature of study but well performed and analyzed. There was a few typos/grammar errors which are fixable.

### COMMENTS TO AUTHORS

Several corrections: Discussion, first paragraph, 7th line - "favored" not "favorable" 2nd paragraph, first line, place "," after "question" 2nd paragraph, third and fourth lines, delete "with this fact on the back of the mind, it could be postulated that" 2nd paragraph, 7th line, place "did" in front of "significantly" Last paragraph of discussion, 4th line, replace "however" with "but"

### COMMENTS TO AUTHORS

This is a very interesting topic. In the text it should be included that search was concentrated to papers in English, German and Dutch (it is in Table 1 but would be very helpful to write it also in the text). There are lacks of variables analysis (age, physical activity, symptoms duration, etc.): that is very important as since conclusions were fully expectable, a richer discussion on variables would give more useful information.
