Water, electrolytes, and acid-base alterations in human immunodeficiency virus infected patients

Musso CG *et al.* Internal milieu alterations in HIV

Carlos G Musso, Waldo H Bellosso, Richard J Glassock

Abstract

11

The clinical spectrum of human immunodeficiency virus (HIV) infection associated disease has changed significantly over the past decade, mainly due to the wide availability and improvement of combination antiretroviral therapy regimens. Serious complications associated with profound immunodeficiency are nowadays
