### COMMENTS TO AUTHORS

Major comments: 1. Author should make several table of various risk factors and complications taking together of previous reports. 2. Author should make a figure regarding therapeutic strategy focusing on the future direction. Minor comment: Author should make a more sophisticated style of manuscript according to Information for Authors in WJG.

### COMMENTS TO AUTHORS

This review is of potential interest however, I have some major remarks: - The manuscript is not adequately organized (there is not even the header "Interoduction") - There is no mention to the possible strategies to treat or avoid the complications listed apart from the infectious ones - The use of tables would help to follow the text
