COMMENTS TO AUTHORS

The manuscript by Rinaldi et al describes the Echinococcosis of the liver. This is a very rare problem for the hepatologists. It is a very well written manuscript with all the necessary details related to the subject.

COMMENTS TO AUTHORS

The authors reviewed about course of infection, diagnosis and treatment of Echinococcosis. Overall I think this paper is well written, but for general readers, I suggested some points. 1. It would be helpful to make the scheme about the life cycle of Echinococcosis. 2. About infection, how to gain entry into the human body. 3. What color is the drained liquid? It would be helpful the liquid is shown by pictures. 4. It would be helpful to add representative CT and MRI pictures including the recurrence after surgery or fatal cases.

COMMENTS TO AUTHORS

Great review work about cystic echinococcosis of the liver. Well written and well explained. As an hepatologist in a non endemic area i have encountered patients with CE and difficult clinical decisions. i think your paper will help a lot to treat these patients.
