SPECIFIC COMMENTS TO AUTHORS

This article presents a nice innovation for the treatment of a pathology that often has a poor prognosis. In medicine, news is always well accepted. I am waiting for a study on a higher number of patients. Great job.

SPECIFIC COMMENTS TO AUTHORS

The authors have reported new customized brachytherapy drainage tube for Bismuth-Corlette type IIIa hilar cholangiocarcinoma with good details of treatment protocol and outcome. Since there are various institute-based customized stents in this treatment as mentioned in discussion part, could the authors discuss more details comparing pros and cons among each of treatment, then compare with this one (if possible).

SPECIFIC COMMENTS TO AUTHORS

The authors report an interesting case of brachytherapy treatment in hilar cholangiocarcinoma. They present patient and treatment data in a concise and illustrative manner, and patient follow-up for an extended period of time. There are, however, grammar inconsistencies in the English language writing, and major review is necessary before publication.

SPECIFIC COMMENTS TO AUTHORS

This is an interesting case of hilar cholangiocarcinoma treatment using novel brachytherapy drainage tube. The case is presented clearly, however the manuscript is lacking a proper and in-depth discussion. The manuscript would benefit from English editing. I would suggest a major revision and re-reviewing the manuscript. As such the manuscript would not be suitable for a good quality journal as WJCC.
