ESPS PEER-REVIEW REPORT

Name of journal: World Journal of Gastroenterology

ESPS manuscript NO: 17291

Title: Signs and genetics of rare cancer syndromes with gastroenterological features

Reviewer's code: 02536288

Reviewer's country: Russia

Science editor: Yuan Qi

Date sent for review: 2015-02-28 09:55

Date reviewed: 2015-03-05 18:32

COMMENTS TO AUTHORS

Dear authors Thank you for an interesting paper. Please make some changes: 1. In introduction part: The knowledge of these findings and the ability to recognize thm (misprint) can help clinicians 2. In Beckwith-Wiedemann Syndrome: newborns [17,18]. (misprint) 3. In The Bloom's Syndrome: "Associated neoplasias" and "Genetics" are in differ places than in other parts 4. In Hereditary hemorrhagic telangiectasia Associated neoplasias is missing 5. Please include a part "Methodology" with information about your scientific search for information - web systems, prefers journals ect.

COMMENTS TO AUTHORS

This manuscript tries to deepen gastroenterologists' understanding of rare cancer syndromes. Description of each syndrome is very concise. To make this review manuscript more practical, please consider the following things. 1. Please make the definition of rare cancer syndromes. 2. In the introduction, please let the readers know how BWS, Bloom's Syndrome, etc are selected more precisely. It is odd that HNPCC, FAP, Peutz-Jegher's syndrome, etc are not included. 3. What is the order of the described syndromes? Is it frequency? It is better to add information of incidence and prevalence. 4. Please try categorization depending upon the manifestations, such as cystic lesions, vascular lesions, and intestinal polyps.
