COMMENTS TO AUTHORS

well done paper, it can be published after minor revision: Please detail better: - how you infuse the drug - how many minutes the infusion lasts - dosage and dilution of drug infused - type of periprocedural medication adopted - on page 8 better specify which kind of RFA you use One last comment is on the references: please reduce the number of references, eliminating the oldest

COMMENTS TO AUTHORS

Title: The title should specify the employed technique more exactly. "Core Tip": The term "completer response" should not be used. Case Presentation 1, second paragraph: "Kupffer's phase"; Figure Legends: "Kupffer phase" -> please be consistent (I would suggest "Kupffer phase"). Technique: Please provide a more detailed description of the procedure. "Author Contributions": The contribution of each author should be specified more clearly.

COMMENTS TO AUTHORS

These cases appear to have responded which may be an important finding. Please comment on how these cases were selected for this study. How many other cases did not respond? The follow up of these cases is relatively short. Can you comment on this.
