COMMENTS TO AUTHORS

This is an interesting manuscript. The study is well designed. In this manuscript, the authors detected the expression of COX-2 and HER-2 in colorectal cancer. And their correlation and clinical significance also be analyzed. The authors found that both COX-2 and HER-2 are important markers for invasion and metastasis of colorectal cancer, and they act together to regulate the invasion and metastasis of colorectal cancer. 1 The manuscript need some editing. The title "Introduction" is missing. 2 Discussion is too long, it can be shortten. 3 Figures should be edited.
