COMMENTS TO AUTHORS

Dear Sirs, The current manuscript studied the dendritic cells and FOXP3 positive T regulatory cells and their interactions in small bowel mucosa of patients with celiac disease with or without type 1 diabetes. There are a few major limitations. 1) lack of control subjects, 2) definition of sampling place (i.e. is the small intestine mucosa the same as jejunum or it is more like duodenum) and 3) lack of knowledge on microbiota. These should be discussed.
