Rituximab therapy for primary glomerulonephritis: Report on two cases

Fabrizio Fabrizi, Donata Cresseri, Giovanni B Fogazzi, Gabriella Moroni, Patrizia Passerini, Piergiorgio Messa

Abstract

The evidence in the medical literature on the efficacy and safety of rituximab therapy for primary glomerulonephritis is limited and controversial. We describe two male Caucasian patients with rapidly progressive kidney failure due to primary proliferative glomerulonephritis. Both of them received high-dose intravenous corticosteroids and oral cyclophosphamide with limited benefit. The first patient (HCV-negative mixed
