SPECIFIC COMMENTS TO AUTHORS

Dear authors, thank you for submitting a rare cases. The language is acceptable, however there are too much details in the presentation of the patient (history and examination), also the BP reading is not needed and needs summarization. The language needs to be grammatically corrected. Introduction is very minimal, please elongate. The patient metanephrine level is not mentioned. There were no postoperative investigations of metanephrine, norepinephrine, ..., please state why? Thank you

SPECIFIC COMMENTS TO AUTHORS

Thank you for the corrected manuscript. There are very few comments. In table 2, next to postoperative icon, there is 72. What do you mean? reference? No need for 1 mmHg= 0.133 kPa in the history part. There is no metanephrine value written in laboratory investigations, which is 31.9 as mentioned in the table. Please capitalize letter B in Brain in imaging examination part. In the treatment part, there is olmesartan/hydrochlorothiazide tablet, it is a combination. Please write each concentration. Remove the word of, it is the last word in conclusion part. Connect the word with in figure 1 legend. Thank you
