## COMMENTS TO AUTHORS

Interesting article. The results look good, but you would need to add a bit on the limitation of any study related to viral warts, which is the natural tendency of wart to resolve spontaneously (although the immunosuppression in this case is an important factor)

## COMMENTS TO AUTHORS

Authors have present a novel case of multiple HPV warts treated with local hyperthermia. Figures are of interest. However, in the discussion authors should explain why the treatment in one local area (knee) has an impact over different no-near areas (nose)and provide a plausible hypothesis.

## COMMENTS TO AUTHORS

I suggest amend the last sentence of the discussion: Local hyperthermia could induce the IFN-induced antiviral activity and apoptosis of keratinocytes This seems to me inconclude.... What do yo think, with a title "Local hyperthermia cleared multiple cutaneous warts"

## COMMENTS TO AUTHORS

This is an interesting clinical report regarding the treatment of multiple viral warts with local hyperthermia therapy. The authors proposed that local hyperthermia could induce the IFN-induced antiviral activity and apoptosis of keratinocytes. Could the authors explain how local hyperthermia could induce resolution of warts at non-treated sites?

## COMMENTS TO AUTHORS

Interesting clinical report. Concerning to viral warts, it is mandatory to warn about the tendency of spontaneous resolution, despite prednisone intake of the patient. Furthermore , the explanation shall encompass not directly heated lesion.

## COMMENTS TO AUTHORS

Interesting method and point of view from Chinese authors, especially that one treated area induces benefic effects on multiple lesions. There are some other studies regarding this option for warts treatment. Every new information related to this subject is very valuable, as long as there is no perfect way to cure the warts, especially in immunosuppressed patients. Could be added the information from other studies such as: One stone, two birds: managing multiple common warts on hands and face by local hyperthermia. Hu L, Qi R, Hong Y, Huo W, Chen HD, Gao XH. Dermatol Ther. 2015 Jan-Feb;28(1):32-5. doi: 10.1111/dth.12178. Epub 2014 Oct 16 Successful clearance of facial common warts by local hyperthermia: report of two cases. Ma Y, Huo W, Hong YX, Chen HD, Gao XH. Dermatol Ther. 2012 Jul-Aug;25(4):386-8. doi: 10.1111/j.1529-8019.2012.01470.x.
