COMMENTS TO AUTHORS

This manuscript represents a fair report of literature review articles on the subject of " HIV infected adolescents". It is an updated report on the spectrum of pathologies and risk factors for adolescents affected by HIV and thus may represent a useful instrument for readers working in this field, although not specific guidelines are described. An attempts to contextualize the pathologies and the risk factors, affecting HIV infected adolescents , to the lifestyle and to the behaviour in the different geographical contexts would have been of interest. Minor point: references 38-40 and 41-42 are misplaced

COMMENTS TO AUTHORS

This paper, reviewing the fate of those infected with HIV perinatally, was very well written and does a great job of summarizing all the relevant literature.
