Fecal incontinence – Challenges and solutions

 Saldana Ruiz N *et al.* Fecal incontinence – Challenges and solutions

Nallely Saldana Ruiz, Andreas M Kaiser

Abstract

Fecal incontinence is not a diagnosis but a frequent and debilitating common final pathway symptom resulting from numerous different causes. Incontinence not only impacts the patient's self-esteem and quality of life but may result in significant secondary morbidity, disability, and cost. Treatment is difficult without any panacea and an individualized approach should be chosen that frequently combines different modalities. Several new technologies have been developed and their specific roles will
