Retrospective Cohort Study

Colonoscopy surveillance for advanced adenomas does not always prevent colorectal cancer

Mouchli MA *et al.* Colorectal cancer following advanced adenoma polypectomy

Mohamad A Mouchli, Lidia Ouk, Marianne R Scheitel, Alisha P Chaudhry, Donna Felmlee-Devine, Diane E Grill, Shahrooz Rashtak, Panwen Wang, Junwen Wang, Rajeev Chaudhry, Thomas C Smyrk, Ann L Oberg, Brooke R Druliner, Lisa A Boardman

Abstract

AIM

To determine the frequency and risk factors for colorectal cancer (CRC) development

2012年7月3日 - Abbreviations used in this paper: CI, confidence interval; CIMP, CpG island methylator phenotype; CRC, colorectal cancer; CT, computed tomography; FDR, first-degree relative; FOBT, fecal occult blood test; HGD, high-grade dysplasia; HP, hyperplastic polyp; HR, hazard ratio; HRA, high-risk adenoma; ...

Surveillance guidelines after removal of colorectal adenomatous polyps

[gut.bmj.com/Archive/Volume 51, Issue suppl 5](http://gut.bmj.com/Archive/Volume%2051,Issue%20suppl%205) ▼ [翻译此页](#)

作者: WS Atkin - 2002 - 被引用次数: 301 - 相关文章

If colorectal screening is introduced this situation will change dramatically. There are few data on the benefits of colonoscopic surveillance in preventing colorectal cancer after a baseline clearing colonoscopy. It is therefore important that this practice is applied judiciously, balancing the risks and benefits in each individual ...
