COMMENTS TO AUTHORS

This is a good, solid study with some flaws in data presentation: 1. Part of the Discussion, which should refer to newly obtained data (Page 8: "In our study... involves intracellular calcium store depletion") repeats paragraphs from the Results section. Needs thorough revision. 2. Fig2A has no sense if alone. Should be placed in one line with a panel similar to Fig1A - only then it is clear to see in the sample tracing that nifedipine modulates the action of gingerol
