SPECIFIC COMMENTS TO AUTHORS

My detailed comments are as follows: 1.In "THE IMPORTANCE OF INNATE IMMUNITY IN THE PATHOGENESIS OF NAFLD" part, the role of Kupffer cells is mainly introduced, while the role of neutrophils, dendritic cells, and NK cells is not mentioned. 2. Large text description is not conducive for readers to understand the content of the article. Please draw a schematic diagram according to the content of each part. 3. Could you add some prospects for NAFLD research?

SPECIFIC COMMENTS TO AUTHORS

The manuscript explores the relationship between NAFLD and metabolism based on previous studies, combs its pathogenesis, and believes that lipid metabolism is an important reason for the occurrence of NAFLD. This view is consistent with the current mainstream research. The manuscript is well-organized and easy to understand. Therefore, the work in this manuscript is a valuable contribution to the field. Thus, this manuscript can be accepted with the following minor changes.
