COMMENTS TO AUTHORS

The importance of comorbidity in cirrhosis and the impact on mortality is indisputable. This manuscript has the potential to provide the reader with a good overview on the known scoring systems derived from epidemiological studies and the possible impact on mortality of single diseases. However the manuscript needs revision, the aim, introduction and the conclusion should be rewritten.

COMMENTS TO AUTHORS

This is an interesting review in which some recent advances in comorbidity of liver cirrhosis have been introduced, including the development of comorbidity scoring systems, such as Charlson Comorbidity Index, CCI-OLT and CirCom score, impact of common comorbidity on cirrhosis prognosis, and so on. It provides some valuable implications for further investigation and clinics.
