The manuscript has been improved according to the suggestions of reviewers:

1 Improving requested language was performed

2 Revision has been made according to the suggestions of the reviewer

(1) Although we can not confirm the absolute accountability of infliximab, suspicion is high compared to the timeline, the reported cases of arterial or venous thrombosis, and absence of other etiologies found.

(2) We discuss about interaction between TNF and the coagulation cascade.

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,
