COMMENTS TO AUTHORS

Very good study, can be published in WJG after minor revision of the language revision.

COMMENTS TO AUTHORS

This study is very interesting. In this study, the authors investigated the relationship between ARID1A expression and clinicopathologic parameters, and its prognostic value for patients with IHCC. The ARID1A protein and mRNA expression in IHCC tissue and PC tissue from 57 patients with IHCC were assessed. The authors found that the low expressed ARID1A is associated with poor prognosis in patients with IHCC, and ARID1A may be a candidate prognostic biomarker in IHCC. 1 Some minor language polishing need to be revised. A native English speaker is required. 2 The data in the results are interesting. But if the authors can make more tables and figure to show the results, it will be better. 3 The references are updated and well discussed.
