

## ANSWERING REVIEWERS

April 7, 2015

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 16286-Review.doc).

**Title:** Adeno-associated Virus Vectors for Human Gene Therapy

**Author:** Haifeng Chen

**Name of Journal:** *World Journal of Medical Genetics*

**ESPS Manuscript NO:** 16286

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewers

### **Answers to Reviewer (1) 00632006**

- A table with tissue tropism, transduction efficiency, and properties of AAV vectors was included.
- Page 12, line 5, "reminder" changed to "remainder"
- Refs 13, 59, and 142's publication years added.
- Ref 51 was removed from the reference based on Reviewer #3's suggestion.
- Ref 78. The year was corrected and page number added.

### **Answers to Reviewer (2) 00505473**

- In Fig. 3 the sizes of protein markers were indicated. Because the protein markers on this silver staining gel was not good, a new gel image with SimplyBlue SafeStain was used to replace the silver gel
- A table was included to show the AAV properties and their applications.

### **Answers to Reviewer (3) 00503952**

- Reference 51 was removed.
- As for the gramatic concerns, I respect the reviewer's oppinion. This article was actuary reviewed and revised by an English speaking Professor of UCSF, John Forsayeth, PhD before it was submitted (see Acknowledgment). However, I asked my other English speaking colleague again to specifically review the sentences cited by this reviewer to make sure that there are no gramatic errors.

3 References and typesetting were corrected

Sincerely yours,

Haifeng Chen, PhD
