Reviewers 1 and 2

Some descriptions of abstract do not coincide with that of bodies. (Abstract: Benign neoplasms included dysplastic Peutz-Jeghers polyps in 3 patients and haemangioma in 1. Non-neoplastic included 1 isolated hamartomatous polyp and 2 inflammatory tumors. Body: 6 were benign (4%), and 2 were non-neoplastic (1,3%).

Thank you for this comment. We agree this sentence was misleading. It has been changed as follows:

Abstract (page 3): Benign neoplasms included dysplastic Peutz-Jeghers polyps (n=4). Non-neoplastic masses included venous malformation (n=1), inflammatory tumors (n=2), and a mass of unknown histology (n=1).

Body (page 7): Of the 14 resected tumors, 6 were malignant (4%), 4 were benign (2,6%), and 3 were non-neoplastic (2%) and the precise histology of one non-malignant tumor was not retrieved.

Due to the vacation season in Poland, I have not been able yet to collect the copyright assignment from all the authors. I presume to be able to complete this by the beginning of September and I hope you would kindly grant us such a prolongation of the deadline.

As we have already got the manuscript edited in English by a professional editing company (SF Edit), we have ask

them to help with all the added fragments in the revised manuscript and therefore we did not apply for a language certificate from any other companies.

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

A handwritten signature in black ink that reads "Anna Pietrzak". The signature is written in a cursive, flowing style.
