COMMENTS TO AUTHORS

This is an excellent review paper dealing with peculiarities and differences of *H. pylori* diagnostic and eradication practice in Eastern Asia. It is worth of publishing and highly recommended to be read by the Western physicians too, where these practices are quite different.

In fact, the policy for diagnosis and treatment of *H. pylori* infection is determined by the local prevalence of the infection. Cost-efficacy relations are also important. The manuscript describes in detail also the progress of knowledge regarding the epidemiology, diagnosis and treatment in the recent years: these must be implemented and applied in the current practice in the forthcoming years.

[] Grade E (Poor)		[] No records	[] Major revision

COMMENTS TO AUTHORS

No doubt, it is a very useful paper. There are some small objections. In the section "THERAPEUTIC REGIMENS FOR *HELICOBACTER PYLORI* ERADICATION, Japan": Which means "Other popular regimens are ..."? Is it included into Japanese guideline? What are evidences of the efficacy of these regimes? What is the efficacy of these "popular regimens".

COMMENTS TO AUTHORS

The manuscript is quite well written. It represents a comprehensive review in the field. It would be useful for the readers to include the discussion of PMID: 20695744.
