COMMENTS TO AUTHORS

The present paper is well written and the references are updated. Only minor points are required for Author revision:

1. Genetic predisposition and/or setting of donor, can present a role in the recurrence of NAFLD after OLT? And the type of diet (i.e. Mediterranean diet)?
2. Is present in literature an intention to treat analysis on the insulin-resistance treatment before OLT in these patients?
3. Information about liver transplantation cost in the text, may be useful.
4. Please use the acronym IR in the text
5. Several double-spaces are present in the text.

COMMENTS TO AUTHORS

Comments I have read with much interest this review, that focusing on liver transplantation in NASH cirrhotic and cryptogenic cirrhotic patients. It is a brief, well done and structured review, that will help to the readers to understand this interesting topic.
